

Available with 58mm throttles, angled toward the center line at 8 degrees to improve hood clearance. Because of the limited space available this unit incorporates a stunning one-piece billet fuel rail which feeds both banks. Hidden under the rail is a BORLA® billet linkage assembly and an adjustable fuel pressure regulator. The linkage incorporates a vacuum accumulator that accepts signals from each throttle bore and provides a connection for the MAP sensor. A dash -6 fitting suitable for a brake booster is also provided.
